

Zhang Wei

Senior Software Engineer

zhangwei@example.com | +86-138-0000-1234 | github.com/zhangwei

Professional Summary

Software engineer with 6+ years of expertise in Python, FastAPI, and distributed systems. Proficient in building AI-powered backend services and cloud deployments. Passionate about LLM applications and RAG system design.

Work Experience

Senior Backend Engineer @ ByteDance (2022.03 - Present)

- Led AI recommendation engine serving 50M+ daily users
- Built LLM-based content moderation pipeline using Python and FastAPI
- Reduced API latency by 40% through Redis caching and async optimization

Backend Engineer @ Alibaba Cloud (2019.07 - 2022.02)

- Developed microservices for cloud storage platform handling 1TB+ daily uploads
- Built distributed task queue system using Celery and RabbitMQ
- Implemented vector search using FAISS for similarity matching

Technical Skills

Languages:	Python, TypeScript, Go, SQL
Frameworks:	FastAPI, Django, React, LangChain, LangGraph
AI/ML:	OpenAI API, DashScope, Ollama, Qdrant, FAISS, RAG systems
Infra:	Docker, Kubernetes, AWS, Aliyun, Redis, PostgreSQL, MySQL

Education

B.Eng. Computer Science - Tsinghua University (2015-2019)

GPA: 3.8/4.0 | Algorithms, OS, Databases, Machine Learning
